

# One News Page

## News Release

5 October 2009

### Tweet news stories from One News Page

International news headlines portal [www.OneNewsPage.com](http://www.OneNewsPage.com) has added a new Twitter user application to its site.

Bringing together news headlines and user reactions on the popular social networking site Twitter, One News Page allows visitors to read tweets on the same subject for any given news story.

Users can not only view a live scrolling display of the latest tweeted comments, but also add their own to the discussion without leaving the site. This feature is unique to One News Page.

Like Twitter, the One News Page tweet box allows a maximum of 140 characters and has a counter that counts down from 140 to zero.

The new feature is now available throughout the One News Page website for news stories in all categories, including the popular Sports, Business and Celebrity news sections. To tweet from the site, users must first enter their Twitter username and password, which can optionally be stored securely for convenience.

One News Page today has almost 5 million stories in its news archive. Each day it adds around 20,000 separate news items from the world's leading news sources.

Last month, the company launched a new iPhone web app, which has already been accessed by over 8,000 users.

#### **Dr Marc Pinter-Krainer, CEO of One News Page, says:**

"Many users of social networking sites love to share news stories and add their own comments on them. What our new Twitter interface also provides is the ability to not only tweet news stories, but also to read tweets from others on the same stories, giving interesting feedback into how stories have been perceived. We believe that no other news portal offers such a feature."

#### **Enquiries:**

Neil Boom

PR Director, One News Page Ltd.

Tel: +44 (0)7866 805 108 (Mob)

#### **Notes to writers:**

The new Twitter integration on One News Page is implemented using a secure server-to-server application interface (API). For any given news headline, a comprehensive search is carried out on Twitter for related tweets, which are displayed with the news content on One News Page.

**About One News Page:**

One News Page is an international news portal website. Aggregating news headlines from major trusted news sources around the World, the One News Page site provides users with a powerful search engine to locate relevant news coverage easily. To access the full news article, users are referred to the source website directly.

Other site features include Twitter integration and customised news RSS feeds.

Users can access the One News Page website for the latest news headlines at <http://www.OneNewsPage.com>.

Optional member registration provides access to live news alerts, news book marking, and more.

Users of mobile phones and iPhone / iPod Touch devices can access the mobile application service of One News Page at <http://m.onenewspage.com>.

Access to One News Page is free of charge.
